

REHAN ALI KHAN

Senior iOS Developer | Mobile Team Lead | Swift, UIKit, SwiftUI | Clean Architecture & MVVM

Karachi, Sindh, Pakistan | +92 307 7464555 | rayhaanalykhan@gmail.com | linkedin.com/in/rayhaanalykhan | stackoverflow.com/users/10124991/rehan-ali-khan

PROFESSIONAL SUMMARY

Senior iOS developer with 5+ years of experience building and maintaining native iOS applications using Swift, UIKit, and SwiftUI, with hands-on experience across MVC, MVVM, and Clean Architecture. Currently serving as Mobile Team Lead at Techelix, leading a team of 2 iOS and 2 Android developers across three apps on the Spark Membership platform (100K+ users, 150+ white-label deployments). Leading the ground-up rebuild of the flagship member app on Swift 6 with Clean Architecture, single-target CI/CD-based white-label builds, and growing unit test coverage. Experienced with RESTful API integration (Moya, Alamofire), payment gateway integration (Stripe, PayPal, Apple In-App Purchase), real-time communication (SignalR, OpenTok/CallKit), and iOS CI/CD and release automation.

TECHNICAL SKILLS

Languages & Frameworks: Swift, UIKit, SwiftUI, TypeScript, Objective-C basics

Architecture & Patterns: MVC, MVVM, Clean Architecture, SOLID principles, Delegate & Observer patterns

Cross-Platform: React Native (in progress)

Networking & APIs: RESTful APIs, Moya, Alamofire, JSON Modeling

Payments: Stripe, PayPal, Apple In-App Purchase

Real-Time Communication: SignalR, OpenTok, CallKit

Data & Storage: SQLite3, Core Data basics

Testing: Unit Testing (XCTest)

CI/CD & Release: Fastlane, GitHub Actions, GitHub, White-label build automation

AI-Assisted Development: Claude Code, Claude Skills (build/release workflow automation)

Tools & Platforms: Swift Package Manager (SPM), CocoaPods, Firebase (Push Notifications, OTP, Analytics), Amplitude Analytics, App Store Connect, Jira, Social Logins, App Localization

Practices: Sprint Planning, Retrospectives, Code/PR Reviews

PROFESSIONAL EXPERIENCE

Senior iOS Developer / Team Lead – Mobile Apps, Techelix

Jul 2025 – Present

Karachi, Pakistan

- Leading the ground-up rebuild of the Spark Member app on Swift 6 with Clean Architecture and MVVM, migrating from a legacy MVC codebase and per-client Xcode targets to a single Xcode target with configuration-based, CI/CD-driven white-label builds.
- Lead a team of 2 iOS and 2 Android developers maintaining and extending three mobile apps on the Spark Membership platform (Spark Member/Student App, Spark Kiosk, Sparktan/Owner App), supporting 100K+ iOS users across 150+ white-label deployments.
- Own sprint planning, Jira ticket management, task assignment, and biweekly cross-team code/PR reviews.
- Drive iOS CI/CD using Fastlane and oversee white-label deployment processes for 140+ white-label clients; coordinate cross-functionally with Backend, QA, and Design; manage App Store submissions and support cases for white-label client apps.
- Introducing unit test coverage across parts of the codebase to improve testability and maintainability.
- Adopting Claude Code and custom Claude Skills to help automate parts of the build and release workflow.
- Adapting to React Native alongside core iOS responsibilities as the company extends select products to a cross-platform stack.

iOS Developer, Techelix

Aug 2024 – Jul 2025

Karachi, Pakistan

- Developed and maintained native iOS features for the Spark Membership platform using Swift and UIKit.
- Led the initial iOS development and release of the Sparktan/Owner App, and implemented Amplitude Analytics tracking to support product usage insights.
- Managed App Store submissions and support cases for white-label client apps, including developer account issues and store-removal notices.

Senior Executive – iOS Developer, Logicose

Nov 2022 – Aug 2024

Karachi, Pakistan

- Integrated PayPal payment processing and real-time communication features using SwiftSignalRClient.
- Implemented voice/video calling functionality using OpenTok and CallKit.

iOS Developer, Logicose

Aug 2022 – Oct 2022

Karachi, Pakistan

- Supported iOS feature development and bug fixes under senior engineering supervision.

iOS Developer, TeamX Pakistan

Aug 2021 – Jul 2022

Pakistan

- Worked as a stand-alone iOS developer, maintaining and developing new native iOS applications.
- Implemented Apple In-App Purchase, Stripe payments, app localization, and social logins.
- Integrated Firebase for OTP verification and push notifications.

iOS Developer, TCS Private Limited

May 2021 – Aug 2021

Karachi, Pakistan

- Learned core iOS development fundamentals, including AutoLayout, delegate and observer patterns, SQLite3, JSON modeling, model parsing, and CocoaPods, under senior supervision.

EDUCATION

Bachelor of Science, Computational Science

Bahria University | Aug 2015 – Jun 2019
